NO DATA CENTER
NO GAS POWER PLANT
PROTECT BIG BEND

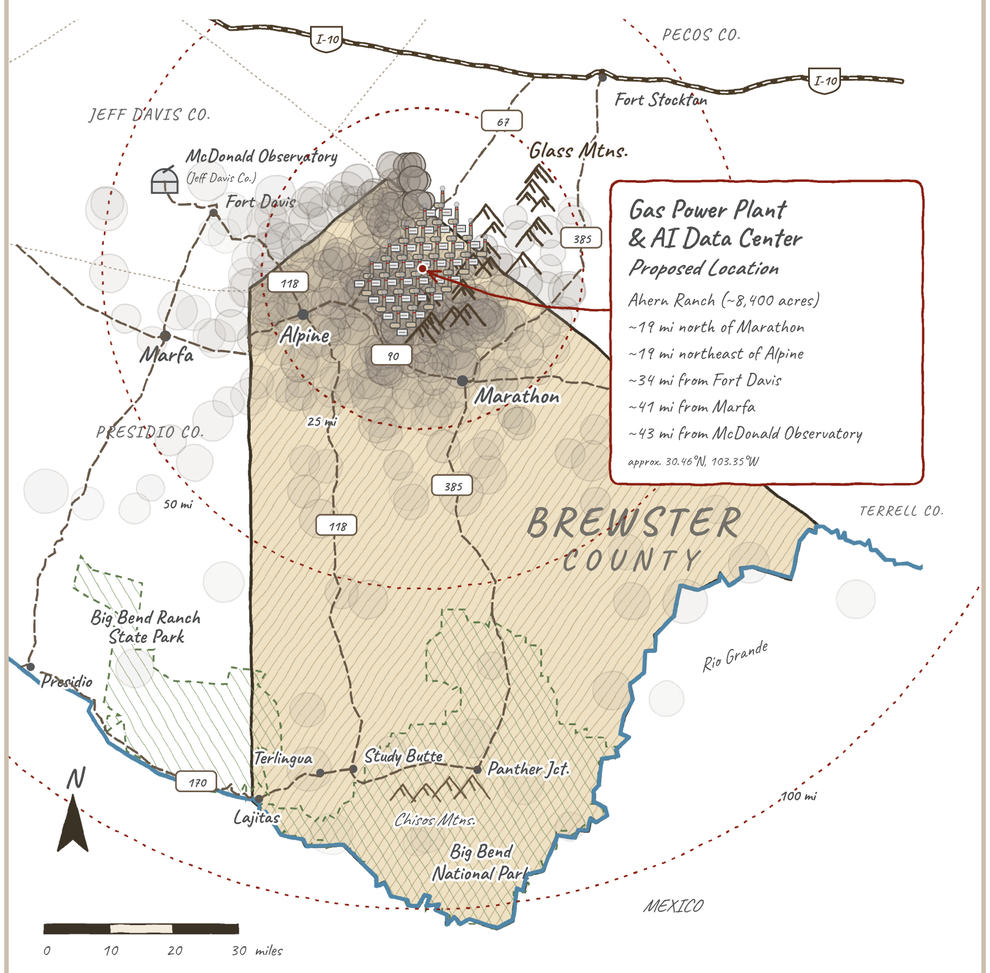

Proposed: Massive AI Data Center and Power Plant for the Ahern Ranch near the Glass Mountains in Brewster County

All the Emissions of Houston. Enough Power for LA. Our New Front Yard?

7.65 GW	**2× Larger**	**33M Tons**	**12,000+ Tons**
bigger than any U.S. plant	than any U.S. gas plant	of greenhouse gases a year	of air pollutants a year

Big Bend Data Center & Power Plant

Sketch map, not to scale; site approximate. Figures above are permits for Pacifico's Pecos County plant, the model for this one. Map: Census TIGER, NPS, TPWD.

Record-Breaking, Just Miles From Town

35 gas turbines on up to half the Ahern Ranch, about 19 miles from Alpine and Marathon.

Scarred at Both Ends?

A border wall to the south; now a record gas plant's haze on Hwy 67, the park's northern gateway.

Testing the Limits of Our Water

A desert in drought where every ranch and town runs on wells — and no stated water source.

Worth the Cost?

A buildout crew as big as Alpine for 5–7 years, then just 100–200 permanent jobs.

No More Dark Skies, No More Quiet Nights?

Construction lights exempt from our rules for 5–7 years, and a turbine hum that never stops.

Not Here. North of I-10.

The Permian has the gas, pipelines, water and workers — and is farther from the park.

Brewster County has time to stop this — speak up now.
