NO DATA CENTER
NO GAS POWER PLANT
PROTECT BIG BEND

Proposed: Massive AI Data Center and Power Plant for the Ahern Ranch near the Glass Mountains in Brewster County

All the Emissions of Houston. Enough Power for LA. Our New Front Yard?

Big Bend Data Center & Power Plant

Sketch map, not to scale; plant drawn larger. Location approximate — no final site disclosed.
Sources: U.S. Census TIGER, NPS, TPWD.

7.65 GW

at the Pecos County sister project — **bigger than any U.S. power plant**, even Grand Coulee (7.1 GW)

2× Larger

than the largest U.S. **gas** plant (3.8 GW) — and more than **Los Angeles** uses on its hottest day (6.5 GW)

33M Tons

of **greenhouse gases** a year allowed there — nearly as much as the entire city of **Houston** (34M)

12,000+ Tons

a year of **air pollutants** allowed there (soot, ammonia, CO, VOCs) — particles that can **drift hundreds of miles**

Figures are permits for Pacifico's GW Ranch in Pecos County, the model for this project.

Brewster County has time to stop this — speak up now.
